Job Application for Software Engineer

Dear Mr./Ms./Dr. LastName,

About Me

Since 2012, I have been working exclusively as a software developer. At my first job as junior developer mainly for C# .NET applications, ranging from desktop and server applications to web applications in which i have been involved in all stages of the development process (design, development and delivery). Throughout my career, I have worked within small to medium sized teams of developers and, in several occasions, I have acted as a project leader for IT projects (i.e., coordinating and supervising other developers). Also, I am accustomed working towards tight deadlines and under high pressure, as I have been involved in large IT projects, as well, for the public sector. For example, to date, I have worked on projects dealing with data entry & data management, to projects dealing with charging, monitoring and analysing user work loads, for the Greek Ministry of Finance and the Payment & Control Agency for Guidance & Guarantee Community Aid. Further my work experience includes: - large scale applications for both private and public sector; - excellent knowledge of C#, ASP.NET MVC; - excellent knowledge of Javascript - strong understanding of MS SQL Server Database; - good understanding of HTML and CSS.
